

Information Assurance

Linxx Global Solutions

Linxx Global Solutions, Inc. (Linxx), a service-disabled veteran-owned small business until the spring of 2015, has offices across the United States. Our business operations in 11 primary locations are managed from our corporate headquarters in Virginia Beach, Virginia. Since 2006, Linxx has offered a wide range of program management, educational, training, and security services around the world. Our Information Technology (IT) infrastructure provides the interoperable and reliable connectivity needed for all components of our business operations. Designed-in architecture robustness ensures IT availability for new business operations. We support all branches of the Department of Defense (DoD); National Aeronautics and Space Administration (NASA); Department of Homeland Security (DHS); intelligence community; and other federal, state, and local agencies.

Information Security and Assurance

Linxx applies Information Assurance (IA) principles and best practices at several of our government contract sites and is expanding capabilities and competency in this important service area. We address the five classic subsets of IA such as; Integrity, Availability, Authentication, Confidentiality, and Nonrepudiation. IA support goes beyond technical applications associated with software and hardware solutions to policy, planning, and risk management on a holistic basis. Risk identification extends to all aspects of critical information creation, use, storage, and destruction including hard copy documents and sensitive equipment. Linxx can assist customers with planning, coordinating, and delivering IA projects or contract deliverables. Our proven risk management processes are ISO 9001:2015 compliant and are consistent with PMI best practices. Our lean quality control discipline, Linxx Six Sigma (L6sigma) is modeled after classic Six Sigma doctrine but tailored to our unique approach to IA problem solving

Information Assurance

Program Security and Continuity

- Provide sufficient backup to support program requirements, without interruption.
- Develop and deliver Continuity of Operations (COOP) and Disaster Recovery Plans in accordance with NPR 1040.1, NASA COOP Planning Procedural Requirements.
- Provide on-call support 24 hours a day, 7 days a week, and 365 days a year for incidents that present a high level of risk to our customer.
- Support and operate two NASA facilities security programs under NPR 1600.1, NASA Security Program Procedural Requirements; NPR 1620.3, Physical Security Requirements for NASA Facilities and Property; and NASA Critical Infrastructure Facilities.

Communications Security

- Provide Communication Security (COMSEC) support including network encryption systems management.
- Conduct COMSEC inspections and inventories at NASA facilities.
- Develop and maintain training aides, material, and programs for contractor personnel who operate and use COMSEC material and equipment.

Summary

Linxx is a well-run, lean company with an excellent past performance record. The value we deliver to our customers can be summed up in one word: Commitment. We are dedicated to improving the technological advancements, security, and skills of America through exceptional customer service. To that end, we employ an appropriate number of former federal employees and service members who leverage their considerable experience and knowledge to accurately address the challenges facing our U.S. Government and corporate customers. In addition to these talented professionals, Linxx employs intelligent, business minded professionals who understand program management, infrastructure, and cyber protection, as well as the importance of work place safety and program quality assurance.
